Continuation of 3. NOTE: The claims raise new issues that would require further search and/or consideration because they recite new limitations that were not searched in the previous office action. For instance, claim 7 recites that the PKB Ser 473 kinase is detectable by a specific assay as compared to another fraction. This was not included the previously examined claims and would require further consideration and/or search.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments have been considered but they do not place the application in condition for allowance because they are directed to new claim amendments that have not been entered because they would require further search and/or consideration. See the Note under item 3 above.
